Equipment and Tools Needed For A Diy Solar System
How to Design A Solar Power System
Installing The System
Final Thoughts
Designing a solar power system means determining the size of the system you need. This size mainly depends on the total electricity requirement of all the appliances the system will power. To do this, list all your appliances and their power (hourly) and energy (daily) consumption. The power rating of each appliance is given in watts (W), and often See more on earth911
