

Making solar panels with optical discs

Overview

Learn how to turn old CDs and DVDs into DIY solar panels in this amazing project tutorial! This video shows you how to recycle CDs and DVDs and convert them into homemade solar panels to harvest free energy from the sun. The process involves repurposing CDs or DVDs as substrates, 2. Using a conductive material to create solar cells, 3. In recent days, a video has gained viral traction across social media platforms, captivating viewers with an innovative idea: transforming discarded CDs into functional solar panels. This engaging tutorial appears to offer an enticing solution for repurposing old CDs and harnessing solar energy. Optical disc solar generators turn this e-waste into clean energy solutions. Unlike traditional solar panels requiring expensive silicon, this method uses aluminum-coated discs - essentially free raw materials with built-in light-reflecting surfaces. Step-by-step, you'll transform discarded media discs into I.
