

# Microgrid UI New Control

## Overview

---

The new microgrid controls accommodate distributed energy power system designs and have the ability to control renewable energy resources (solar and wind) and energy storage - providing a single interface control for a completely integrated microgrid power system. NLR develops and evaluates microgrid controls at multiple time scales. Every community deserves reliable, affordable, and sustainable power — but for remote and isolated locations, energy systems can be complex and costly to. SEL is the global leader in microgrid control systems, verified by rigorous independent evaluations and proven by 15+ years of performance in the field. Our powerMAX Power Management and Control System maximizes uptime and ensures stability, keeping the microgrid operational even under extreme. Generac Link Microgrid Controllers are purpose-built to orchestrate multiple energy assets—solar, storage, generators, and more—into a unified, efficient power system. The sophisticated system is embedded with a military-grade cybersecurity protocol to mitigate the growing threat of cyberattacks and.
