

New Energy Solar Wind Power Generation

Overview

Get the latest renewable energy news, trends, and insights on solar, wind, storage, and policy changes. Stay ahead with Factor This' expert coverage. Globally, renewable power capacity is projected to increase almost 4 600 GW between 2025 and 2030 – double the deployment of the previous five years (2019-2024). Growth in utility-scale and distributed solar PV more than doubles, representing nearly 80% of worldwide renewable electricity capacity. In our latest Short-Term Energy Outlook, we forecast that wind and solar energy will lead growth in U. power generation for the next two years. solar power generation will grow 75% from 163 billion kilowatthours. Solar, wind, and batteries are set to supply virtually all net new US generating capacity in 2026, according to EIA data reviewed by the SUN DAY Campaign, continuing their strong 2025 growth. EIA's latest monthly “Electric Power Monthly” report (with data through November 30, 2025), once again. Factor This' News section is your premier destination for the latest updates and in-depth analysis across the renewable energy sector. From pv magazine USA November 2025 marked the 27th.

New Energy Solar Wind Power Generation

[Integrating solar and wind energy into the electricity grid for](#)

To strengthen community grids and improve access to electricity, this article investigates the potential of combining solar and wind hybrid systems. This is viable approach to address energy ...

Renewable electricity - Renewables 2025 - Analysis

Globally, renewable power capacity is projected to increase almost 4 600 GW between 2025 and 2030 - double the deployment of the previous five years (2019-2024). Growth in utility-scale and distributed ...

Latest Renewable Energy Updates, Trends & Insights

Get the latest renewable energy news, trends, and insights on solar, wind, storage, and policy changes. Stay ahead with Factor This' expert coverage.

[Globally interconnected solar-wind system addresses ...](#)

Here, we demonstrate the potential of a globally interconnected solar-wind system to meet future electricity demands.

[Solar and wind to lead growth of U.S. power generation for the next ...](#)

In our latest Short-Term Energy Outlook, we forecast that wind and solar energy will lead growth in U.S. power generation for the next two years. As a result of new solar projects coming on ...

[Solar and wind power has grown faster than electricity demand this ...](#)

Worldwide solar and wind power generation has outpaced electricity demand this year, and for the first time on record, renewable energies combined generated more power than coal, according to a new ...

[US solar capacity overtakes wind - pv magazine International](#)

Solar has become the largest renewable source of installed power capacity in the United States, surpassing wind after 27 consecutive months as the leading source of new grid additions, ...

[EIA: 99%+ of new US capacity in 2026 will](#)

be solar, wind + storage

Solar, wind, and batteries are set to supply virtually all net new US generating capacity in 2026, according to the latest EIA data.
