

Off-grid solar system project budget

Overview

Off-grid solar systems typically cost between \$45,000-\$65,000 for a complete home setup, significantly more than grid-tied systems that average \$15,000-\$20,000. Battery storage represents the largest expense in an off-grid system, often accounting for 30-40% of the total. With advances in solar technology and falling equipment costs, setting up a reliable off-grid solar system has become an achievable project for homesteaders, RV travelers, and even suburban homeowners seeking energy independence. Read our guide to determine whether this expense is worth it for your home.
