Overview

To build a utility-scale solar plant 1], you must budget approximately $800,000 to $1,200,000 per megawatt (MW) of installed capacity. The total cost is dominated by the solar panels, inverters, mounting systems, and grid connection fees. Use a formula based on system size, panel wattage [^2], and a factory-direct price per watt, then add local labor [^3] and logistics for a complete project budget. I've seen too many businesses.
