

Perth PV energy storage project bidding

Overview

Western Australia has opened two new Capacity Investment Scheme (CIS) tenders designed to add 1.4 gigawatt-hours (GWh) of storage to the state's grid, unlocking an estimated \$4 billion in private capital. The successful clean dispatchable capacity projects will be able to. The government of Western Australia has announced seven successful project bids in round three of its clean energy future fund scheme, including two First Nations renewable energy projects that will share \$5.5 million from a \$16 million pool.
