

# Photovoltaic 10kV high voltage inverter

## Overview

---

Three Phase High Voltage hybrid inverter solar enables direct MV grid connection, simplifies system design, and stabilizes large-scale renewable integration. Connects directly to 10kV+ grids, removing step-up transformers to cut losses and boost efficiency. Let's explore why this technology is becoming. An on-grid inverter's main job is to convert DC power generated from the PV array into usable AC power. Save on your electricity bills while staying prepared for unexpected power outages Compatible with Multiple Battery Types: Designed to work with AGM, GEL. The X1-VAST is built for advanced home energy systems, with seamless integration into microgrids and generators for reliable off-grid use. With support for V2G and V2H applications, it enables advanced EV energy integration, making it ideal for future-ready smart homes. The X1-VAST supports 200% PV.
