

# Photovoltaic bracket sales job requirements

## Overview

---

The qualifications to get a job as a solar sales representative include an associate degree in a relevant field and good negotiation and speaking skills. Employers may provide training for you to learn about their solar products. PV Technical Sales Representatives, also known as Solar Sales Representatives, specialize in selling solar panel systems and its related products to both residential and commercial clients. This includes identifying potential clients, presenting and explaining the benefits of solar energy, partnering with internal teams to design solar energy systems based on the clients'. A Solar Installer, or PV Installer, is responsible for planning and installing photovoltaic systems that deliver solar power to homes and businesses. In this role, you may evaluate the suitability of each location for solar systems, help create estimates for costs and savings, and answer any questions that customers have.
