

Photovoltaic energy storage construction cost accounting table

Overview

The tables presented below are also published in the Electricity Market Module chapter of the U. Energy Information Administration's (EIA) Annual Energy Outlook 2022 (AEO2022) Assumptions document. NLR analyzes the total costs associated with installing photovoltaic (PV) systems for residential rooftop, commercial rooftop, and utility-scale ground-mount systems. This work has grown to include cost models for solar-plus-storage systems. NLR's PV cost benchmarking work uses a bottom-up. The benchmarks in this report are bottom-up cost estimates of all major inputs to PV and energy storage system (ESS) installations. Bottom-up costs are based on national averages and do not necessarily represent typical costs in all local markets. How much does a solar PV system cost?

The average. Each year, the U. Department of Energy (DOE) Solar Energy Technologies Office (SETO) and its national laboratory partners analyze cost data for U.
