## Overview

---

With a roof made of non-combustible stone wool materials, the risk of a fire spreading beyond the solar panels and threatening the integrity of the roof or adjacent buildings is sharply reduced. Solar panel installations put a mechanical load on the underlying roof construction. In Europe, the Energy Performance of Buildings Directive (EPBD) includes legal requirements for buildings to meet stepwise improvements in energy efficiency (with among other things, insulation) and to install rooftop solar panels on different building types by certain dates. The obligation to. Frankfurt - Thursday, 08 of August 2024 - DEUTSCHE ROCKWOOL, one of the leading suppliers of stone wool insulation materials for the building sector, has decided to work with solar startup ENVIRIA to implement a large-scale photovoltaic system at one of its three production sites in Germany.
