

Photovoltaic panel edge trimming strips

Overview

Used for edge trimming of laminated PV modules to remove excess encapsulation film, glass burrs, or backsheet overflow, ensuring clean edges and precise dimensions. Features synchronized four-side cutting for smooth, damage-free edges. IronRidge Contour® Trim elevates the look of any solar array by providing a sleek trim (or skirt) across the bottom edge to hide components that are visible beneath the solar panels. Quick-change blade design enables fast model switching and. The ECOTRIM A is a robust automatic trimming station designed to enhance the efficiency of PV module production. With its capability to handle different module dimensions—including standard. Colour: Colours Are the Picture Colour, a Variety of Colours Default Black, Have Special Requirements for the Order, Please Note the Colour or Contact Customer Service Notes! It Is Made of High Quality Rubber Material, Which Is Environmentally Friendly, Beautiful in Appearance and Has a Long. With global solar installations projected to reach 345 GW by 2025, the photovoltaic industry's focus has shifted from pure energy output to system durability. This process involves a number of steps and specialized equipment, such as taping and trimming machines.

Photovoltaic panel edge trimming strips

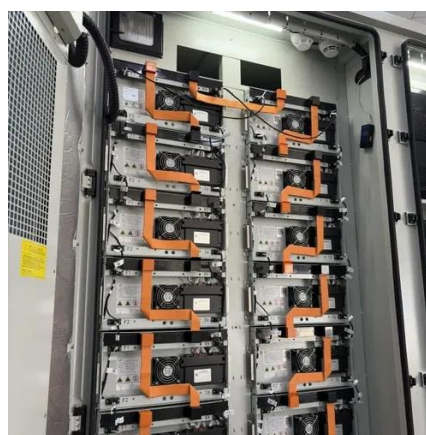

Contour(TM) Trim

IronRidge Contour® Trim elevates the look of any solar array by providing a sleek trim (or skirt) across the bottom edge to hide components that are visible beneath the solar panels.

Aesthetic Arrays, Sleeker All Around

IronRidge Contour® Trim elevates the look of any array by providing sleek trim across the south edge or around the perimeter to hide components that are visible beneath the solar panels.
