

Photovoltaic panel equipment depreciation rate

Overview

TCJA allows for 100% depreciation of solar panels and systems in the first year of service of a commercial solar system versus over five years. However, the efficiency, value, and performance of PV panels all decline with age. And in order to maximize the return on. The OBBB signed into law by President Trump on July 4, 2025, fundamentally alters the depreciation landscape for solar energy systems. Qualifying solar energy equipment is. The MACRS depreciation schedule allows businesses to keep solar installation costs manageable, as accelerated depreciation for solar projects reduces the immediate financial burden of investing in solar. Note that the Internal Revenue Service (IRS) accounts for half of the available tax credit, so. MACRS depreciation for each company may vary based on their tax situation. In our example below, for Sunshine Hardware the depreciable life of solar panels is 80% of the full solar system cost which may be depreciated roughly as follows: Year 1 - 20%, Year 2 - 20%, Year 3 - 20%, Year 4 - 20%, Year. One of the most powerful tools at your disposal is the Modified Accelerated Cost Recovery System (MACRS), a tax depreciation method that allows you to recover the cost of your solar assets more quickly through tax deductions. This guide will walk you through the essential aspects of MACRS by.
