

# Photovoltaic panel hollow pile

## Overview

---

Photovoltaic ground piles are essential components for supporting solar panel systems in outdoor installations, providing a stable and durable foundation. Concrete piles, though durable, face their own challenges: Cast-in-place concrete piles are labor-intensive and slow to produce at. Steel beams are a popular choice for bearing piles for bridges, buildings, stadiums, and industrial structures. The helical pile length can be adjusted to any desired mounting elevation. Top mounting plates can be custom designed to the application requirement. Contact your local MPS Distributor for additional. Our unique manufacturing facility has the capacity to produce an unlimited number of custom shapes to match the job site specific loading conditions for solar applications.
