

Photovoltaic panels clear snow news

Overview

The best way to keep your solar panels working at their best is to clean the snow off them. Over time, the snow will melt and slide off your panels on its own. If you want to speed up the process or are concerned about the amount of snow piling up on them, then. If you live in a snowy area and have solar panels—or you're thinking about installing them, you've probably wondered the same thing every winter: Do I need to remove snow from my solar panels?

And if so, what's the easiest way to do it?

The short answer: In most cases, you don't need to do anything. This raises common concerns about solar panels and snow removal in regions with long, snowy winters. That's why homeowners frequently ask how to keep snow off of solar panels to maintain consistent performance. But for a homeowner with solar panels, that beautiful blanket of snow can bring a flurry of questions and concerns. They are made for outdoor use, after all.
