

Photovoltaic panels installed on the roof of a rental house

Overview

Can I install solar panels on the roof of a rented home?

In theory, yes. But we wouldn't recommend this; it doesn't make sense to spend so much on a property. According to the Center for Sustainable Energy, a 5-kilowatt solar power system typically costs between \$13,500 and \$16,250 to install. Unfortunately, going solar is a lot less straightforward for those of us who live in an apartment complex. Installing solar panels on a rental property offers a win-win situation for both landlords and tenants. Before proceeding with solar panel. The simple answer for renters who want solar panels for their apartment or house is that it's possible! While you may be able to pitch your landlord to install a rooftop solar panel system, community solar is more likely to be your best bet to enjoy the benefits of solar if you don't own your roof. Rooftop solar turns unused space into a clean energy source that lowers costs and increases home value. This guide explains how it works, what it costs, and how to plan a safe, efficient installation. This page will explore the benefits, potential drawbacks, and key considerations associated with embracing solar energy in rental property management.
