

Port louis compressed air energy storage project

Overview

This paper provides a comprehensive overview of CAES technologies, examining their fundamental principles, technological variants, application scenarios, and gas storage facilities. This technology strategy assessment on compressed air energy storage (CAES), released as part of the Long-Duration Storage Shot, contains the findings from the Storage Innovations (SI) 2030 strategic initiative. The objective of SI 2030 is to develop specific and quantifiable research, development. CAES offers a powerful means to store excess electricity by using it to compress air, which can be released and expanded through a turbine to generate electricity when the grid requires additional power. 56 billion) to the Porthos project.
