

Price list for installing photovoltaic panels in residential buildings

Overview

Most homeowners spend between \$12,600 and \$33,376 to install a complete residential solar system in 2026, with the national average at \$19,873 before incentives. Your actual cost depends on your home's energy needs, roof characteristics, location and other factors, all of which we'll break down in. The cost of installing solar is far less intimidating when you understand the various components, how savings are generated, and different ways to lower your cash outlay through financing. This work has grown to include cost models for solar-plus-storage systems. System size, panel type, and labor needs are the biggest cost drivers, along with your roof's condition and any upgrades.
