

RV solar needs to change inverter

Overview

Selecting the right inverter for your RV is just as important as selecting the proper size solar system and batteries. Factors like running wattage, surge wattage, and the types of appliances you plan to use are important in determining the appropriate inverter size. Inverters convert the direct current (DC) energy generated by solar panels and stored in the batteries, into alternating current (AC) electricity needed to power the appliances and devices typically found in an RV. They say knowledge is power, and in this case, it's literally true. DC Power (12V): Supplied by the auxiliary battery bank. Scroll to the bottom of any page to find a sun or moon icon to turn dark mode on or off! Newbie RV solar and hybrid inverter upgrade questions.
