

Sierra Leone space-based solar base station

Overview

Called Solar Park Freetown, the project would provide an extra six megawatts to Sierra Leone's already burgeoning solar power networks. In addition to providing manufacturing jobs to people who need it, Solar Park Freetown will bolster Sierra Leone's shaky central power. Baoma Solar Power Station, is a 25 megawatts (34,000 hp) solar power plant under construction in Sierra Leone. The first phase of this renewable energy infrastructure with generation capacity of 5 MW is operational and was commercially commissioned in December 2022. The initiative will deliver sustainable, affordable energy and create opportunities for all across the nation. The Government of Sierra Leone, through the Ministry of Energy and with financing from the World Bank, commissioned a. Sierra Leone is taking significant steps to improve its low electricity access rate by committing to various renewable energy projects.
