

Sine wave inverter based on SG3525

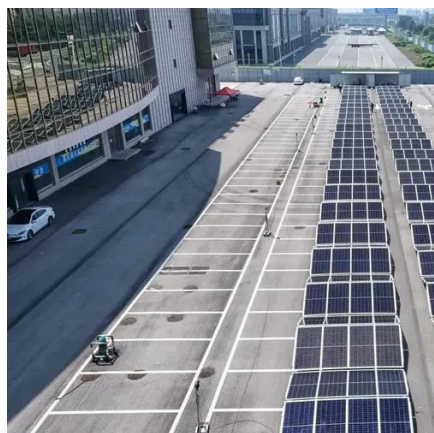

Overview

In this post we will discuss two methods of designing pure sine wave inverter circuits using 555 IC based SPWM processing. The complete circuit is divided into three main sections, the SG3525 pwm square wave generator. The SG3525 is a versatile PWM (Pulse Width Modulation) controller IC commonly present in inverter circuits to convert DC to AC at either 50Hz or 60Hz.
