

# Solar container communication station supercapacitor cable project

## Overview

---

This project will show you how to run an ESP32-C3 devboard without a battery, just with a small solar panel and a 10F supercapacitor. This integration can be accomplished in several ways, including linking supercapacitors and solar cells in parallel, in series, or by combining electrolytes. The integrated system provides efficient energy storage and conversion in a single system and. Construction of supercapacitors for small residential solar container communication stations
