

Solar container outdoor power stacking package installation

Overview

In today's video, I install an EG4 6000XP inverter from Signature Solar, wire in 4,150 watts of solar, add a load panel, run lighting, mount electrical boxes, and build out the entire system inside a steel shipping container — without drilling a single hole. In off-grid business use, a Solar PV Energy Storage box represents an autonomous power solution that has photovoltaic (PV) arrays, storage batteries, inverters, and controls. Every part of this install is secured. There are many ways to skin a cat, and even more ways to add solar power to a shipping container. Discover how stacking package installations revolutionize outdoor power management. Learn key techniques, industry. RPS supplies the shipping container, solar, inverter, GEL or LiFePo battery bank, panel mounting, fully framed windows, insulation, door, exterior + interior paint, flooring, overhead lighting, mini-split + more customizations! RPS can customize the Barebones and Move-In Ready options to any design. We make mobile solar containers easy to transport, install and use. That is why we have developed a mobile photovoltaic system with the aim of achieving maximum use of solar.
