

Solar energy for the environment doha

Overview

The new solar farm, which is now under construction, will soon power up to 50% of the capital city, Doha. This bold step is part of the country's ongoing effort to shift toward cleaner and greener energy solutions, and it marks a major turning point in the Gulf region's. The nation has embarked on carrying out behemoth projects, thereby reflecting its national orientation toward a green economy to reduce reliance on biofuel, an approach that reflects concrete steps toward achieving the environmental and energy objectives of the Qatar National Vision 2030. This move is set to position renewable energy as a core pillar in the country's national energy mix, showcasing its economic. Located 80 km west of Qatar's capital, Doha, the Al Kharsaah Solar PV Independent Power Producer (IPP) project is the country's first large-scale solar power plant and is set to significantly reduce its environmental footprint. Al Kharsaah is owned and operated by SPV Siraj, a consortium formed by. Qatar has officially started building one of its biggest solar energy projects to date. A documentary detailing the evolution of the two solar power plants was shown during the unveiling ceremony, which took place at Ras Laffan Industrial City.
