

Solar energy research and development colombia

Overview

Colombia is establishing itself as a solar benchmark in Latin America, thanks to its high solar radiation in regions like the Caribbean, the Eastern Plains, and western Cundinamarca. The country's installed solar capacity surpassed 1 GW in 2024, an exponential increase. This document provides an overview of wind and solar energy in Colombia at the beginning of 2025. Climate change is predicted to significantly impact solar energy generation, which is particularly concerning given that photovoltaic (PV) energy is critical to the global transition to clean energy in underdeveloped countries.
