

Solar energy system engineering warranty period

Overview

A product warranty covers material or manufacturing defects under normal use, typically lasting 10–15 years for solar modules. Each component of a solar system comes with different warranty coverage. Key Note: The mismatch between module (30-year performance) and inverter (5–10-year product). Solar contractor warranties are essential to your solar energy system's overall protection. They ensure the solar panels are correctly installed, and the system operates as intended.
