

# Solar glass secondary factory

## Overview

---

In Georgia, it's building a factory to turn recycled solar glass into glass for new panels. Until recently, when a solar panel reached the end of its useful life—after 25 or 30 years—it probably ended up in a landfill. Any valuable materials inside it were lost. As in India and China, new facilities are popping up in North America, with unique twists to ensure competitiveness, such as using recycled material. 4 MW solar plant in. U. photovoltaic recycling company SOLARCYCLE has officially launched its module recycling plant in Cedartown, Georgia, which can process up to 5GW of photovoltaic modules annually. Stewart Glass is establishing what officials call the “first fully operational solar glass. NSG Group is pleased to announce the warm up of a newly converted TCO (transparent conductive oxide) facility in the United States.

## Solar glass secondary factory

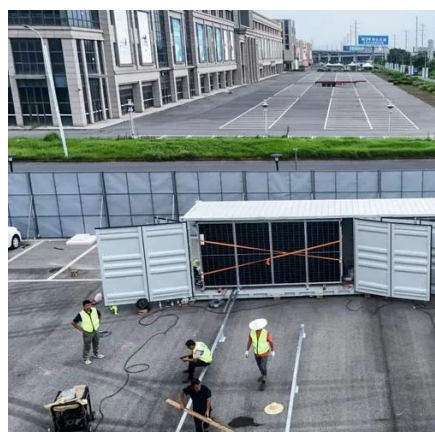

### [Silfab Solar to Secure Additional Domestic Content Through ...](#)

SOLARCYCLE recently announced plans to build a first-of-its-kind factory in Georgia to use recycled materials from retired solar panels to make new solar glass.

### [SOLARCYCLE® to Open First-of-its-Kind Solar Panel Glass Plant in ...](#)

SOLARCYCLE's new facility in Georgia will position the company as one of the first manufacturers of specialized glass for crystalline-silicon (c-Si) photovoltaics in the U.S., with the ...

### [New U.S. Solar Glass Production Line Starts Operation](#)

An existing float line at the Rossford, Ohio factory of Pilkington North America, Inc., a member of NSG Group, has been converted to begin producing TCO glass from March 2025.
