

Solar inverter life test

Overview

Solar inverters last 10–15 years on average, with microinverters and power optimizers often lasting 20+ years. Heat, quality, installation, and maintenance heavily influence lifespan. This guide explains typical inverter lifespans, warning signs of failure, and when an upgrade is worth it, especially if you're considering adding a battery or EV charger. **How Long Do Solar Inverters Last?**

Most homeowners will need to replace their inverters at some point. On average, they'll serve you well for a decade or more. Panels can reliably produce power for. The lifespan of your inverter directly affects your ROI, but most importantly, your maintenance planning and overall system workability. While premium European models can function.
