Overview

The average solar panel ROI in the United States ranges from 10-15% annually, compared to the stock market's historical average of 8-10%. Solar ROI varies dramatically by location. California homeowners often see returns exceeding 20% annually due to high electricity rates and. Installing solar panels is a long-term investment that can pay for itself through utility bill savings. The actual solar panel return on investment (ROI) time depends on several factors, including the cost of panels installed and average monthly savings, which can be maximized with leading. We currently sell a 6.9 kW SolarEdge / Astronergy system for \$10,224.70 (price is current as of 11/22/2019, the date we published this guide). Unlike the simple payback period that only tells you when you'll break even, ROI reveals the total profit potential of your solar installation. And while the cost of buying solar can make you wonder if home solar panels are worth it, solar panels can typically save you enough money to cover the cost and more. Federal Tax Credit Urgency: The 30% federal tax credit.
