

Solar photovoltaic panel rail construction

Overview

Solar rails are horizontal-supporting grills which ensure that panels are properly mounted and do not fall off. Installation by Solar Foundations USA®, Inc. In the event of a conflict between this manual and any code, the installer shall contact Solar Foundations USA® supplied/specified. While solar panels often steal the spotlight, the unsung hero of any successful photovoltaic (PV) installation is the solar mounting rail system. This critical structural component is responsible for securely fastening your panels to the roof or ground, ensuring optimal angle for maximum energy. Solar panel rail mounts are an essential component of any solar panel installation. From the warehouse to the jobsite, from the box through a lifetime of service: Simple. One clamp for 30-40mm panels, mids and ends.
