

Solar photovoltaic panel tax rebate

Overview

The Residential Clean Energy Credit allows you to claim a deduction for the cost of new clean energy property, including solar panels. The credit for solar upgrades was extended through 2025, empowering more homeowners to switch to solar. If you invest in renewable energy for your home such as solar, wind, geothermal, fuel cells or battery storage technology, you may qualify for an annual residential clean energy tax credit. Any system installed after this year won't qualify for the discount that's helped millions of households cut thousands off their installation costs. On July 4, 2025, President Trump signed into law Congress's budget reconciliation bill, H. 1—commonly known as the One Big Beautiful Bill. This legislation brings significant changes to the federal tax credit for residential and commercial solar and battery systems. Find out if you qualify and learn how to claim the solar tax. Time is Critical: With Congressional proposals ranging from end-of-2025 to 180 days after bill enactment, homeowners have an extremely narrow window to secure the full 30% federal solar tax credit before potential elimination.
