

Solar power generation converted to household electricity

Overview

Solar energy technologies can be classified into two main categories: photovoltaic (PV) systems and solar thermal systems. Photovoltaic systems are the most popular for residential electricity generation, utilizing solar panels to convert sunlight directly into electricity. Since 2008, hundreds of thousands of solar panels have been installed across the country as more and more Americans choose solar energy for their daily lives. You can join them to illuminate the future of energy.
