

# Solar power generation in Sydney

## Overview

---

The rollout of solar panels on every residential and industrial rooftop in metropolitan Sydney would generate 21GW of renewable energy, enough to power 75 per cent of the city's annual energy needs. Up to 75 per cent of metropolitan Sydney's annual energy needs could be met if every rooftop had solar panels, according to a new report released today by independent think-tank Committee for Sydney. The 'Sydney as a Renewable Energy Zone' report makes six key recommendations, including mandating. This is about more than electrons. It's about economic development, energy equity, and empowering residents to achieve energy equity. As coal power stations age and shut down, NSW urgently needs to explore how Sydney's rooftops could provide a metropolis of energy equity and abundance and help lead New South Wales' clean energy transition?

Explore the insights, barriers and actions that could make it possible. New South Wales urgently needs to shift to clean energy. These solar farms support jobs and investment in regional NSW, help to diversify the State's energy mix and drive down costs for future large-scale solar developments. In summer, when the sun is out for longer and more directly overhead, you can expect to get about 6.

## Solar power generation in Sydney

### Solar energy

A recent report suggests that establishing a Sydney Renewable Energy Zone (REZ) in New South Wales could yield up to 21GW of renewable ...
