

Solar power generation is worth installing

Overview

Solar power is absolutely worth the investment—especially now. With rising electricity costs and generous federal and state incentives, switching to solar can cut monthly bills, increase home value, and provide long-term energy independence. But new federal legislation has accelerated the expiration of the 30% tax credit for homeowner-owned solar systems, moving. Solar panels are an upfront investment that can save homeowners a significant amount of money in energy costs over the life span of the panels.
