

Solar power generation repurchase price

Overview

Considering a solar plan with real-time wholesale buyback?

Explore our price tool to see current prices and historical averages. The RTW is the price of power in wholesale markets, reflecting supply and demand. Solar buyback solutions are a unique type of electricity plan that helps maximize the value of solar panel systems. A solar buyback plan and net metering are great options for solar homeowners. They incentivize more people to produce more electricity from solar. This data is expressed in US dollars per kilowatt-hour. It is adjusted for inflation but does not account for differences in living costs between countries. Data source: IRENA (2025); IRENA (2024) - Learn more. Revolution Energy buys back excess solar generation at the customer's purchase price capped an amount equal to 100% of their usage from the grid for that billing period.
