

# Solar power system budget

## Overview

---

In 2025, the average cost of installing a residential solar panel system in the U.S. ranges between \$13,000 and \$18,000 before incentives, depending on factors such as location, system size, and equipment quality. Tip: These prices include panels, inverter, labor, permits. Strong ROI Fundamentals: Most homeowners achieve 6-10 year payback periods and save \$31,000-\$120,000 over 25 years, with solar electricity costing 6-8 cents per kWh compared to 16. Solar power costs have reached historic lows in 2025, making home solar more affordable than ever. It's possible with the right approach to solar power budgeting and system design. Some connect to the grid, some store backup power, and some function entirely off-grid. This article breaks down the essential factors to consider when selecting a solar power system, so you can invest with confidence and get the maximum return on your investment.
