

South Korea s largest solar power station

Overview

South Korea has switched on a 47 MW floating solar array at the Ihma Dam, marking the country's largest project of its kind. Solar PV capacity accounted for 16.4% of total power plant installations globally in 2023, according to GlobalData, with total recorded solar PV capacity of 1,496GW. This is expected to contribute 33. The project features a resident-participation model allowing those living within a one kilometer radius to share profits from its power supply. Imha. Daedong Mobility recently completed the construction of South Korea's largest rooftop solar power plant at S-Factory in Daegu.
