

Storedge inverter cost

Overview

SolarEdge inverter costs in 2025 range from \$1,367 for basic residential models to over \$6,500 for commercial systems, but the total system investment including optimizers and installation typically runs \$5,500-\$9,000 for residential applications. Premium Technology Justifies Higher Costs: While SolarEdge systems cost 20-35% more than basic string inverters (\$5,500-\$9,000 vs \$3,000-\$5,000 for residential installations), the module-level optimization delivers 15-25% higher energy production, typically paying for the premium within 2-3 years. The StorEdge is an all-in-one solution using a single DC optimized inverter to manage and monitor both solar power generation and energy storage. com sells SolarEdge Inverters at the lowest cost. Order Online or Call Us! 888-899-3509 . Pricing is an estimate, kits are customized for each building variation. Get started with \$0 down and qualify for the 30% Federal Tax Credit Explore our financing options » Pricing varies based on system configuration, city and utility requirements. Freight shipping varies by location.
