Renewable energy is energy from natural resources which are "replenished at a higher rate than consumed" such as wind, solar and geothermal. However, rooftop solar PV has not yet been widely adopted in many sub-Saharan African countries, such as Sudan, although they are endowed with high. The solar system is one of the cleanest and most accessible renewable sources of energy, which is abundant, sustainable, and free. Solar energy is readily available and easy to harness, even in remote areas. It can be converted into electricity using photovoltaic cells and thermal panels.
