

# The future trend of vanadium battery energy storage

## Overview

---

Once considered a niche application, vanadium flow batteries (VFBs) are emerging as a major driver of future vanadium demand as global decarbonisation targets accelerate the need for long-duration energy storage solutions. The market size was estimated at \$584. Vanadium is a high-strength, corrosion-resistant metal widely used to improve the performance of steel. The transition to clean energy and long-duration storage is transforming how we think about materials. In this blog we explore what is driving the dynamic Vanadium Market today from global standards for vanadium electrolytes to record-breaking flow battery deployments and shifting demand dynamics.
