

The neighbor in the front yard built a photovoltaic panel

Overview

Generally speaking, the answer is NO, a homeowners association is not able to prevent you from installed solar panels, and that is solidly in law in Florida Statute 163. Solar panels require direct access to sunlight to generate energy -- but what can you do to prevent the possibility that your neighbor will add a second story or plant a large tree?

Why Trust Us?

Fact-Checked Nolo was born in 1971 as a publisher of self-help legal books. He expects me to have the panels relocated somewhere else on my roof so the glare goes away. The thing is that before the installation was done, the HOA approved the solar panel install plan. Installing solar panels, whether on your roof or as a ground array, is exciting, but sometimes, it can become a battle with your neighbors, especially if they weren't aware that you were going to it. Complaints about glare and aesthetics, especially if you live in a residential estate or complex. The best location for solar would be the front of my roof, facing the street. I'm trying to decide if that is going to look ugly and annoy neighbors. I could put them in the back but that would apparently require about 30% more panels (more expensive) to get equivalent energy production. I drove. Scroll to the bottom of any page to find a sun or moon icon to turn dark mode on or off! We are building our new house and have plans to add a ground mount solar in our back yard. I live in Melbourne, Victoria.
