

The solar integrated machine is fixed on the tile

Overview

Rather than being installed on the roof surface, in-roof solar panels are integrated into the roof itself, replacing roof tiles, while standard panels are mounted on brackets fixed between the roof tiles. The approach to installing a solar array on tile roofing is entirely different from installing on any other roof type. Like any installation, there are essential factors to consider before the on-roof. The IntegraRack IR-T1 TileBallast™ Solar Module Roof Mount eliminates the need for tile removal or. Solar Tiled Roof™ combines solar and roofing functionality into a perfect energy production system without compromising the visual appearance of your home. An integrated solar roof.
