

Types of vawt wind turbines

Overview

There are two main types of Vertical Axis Wind Turbines. I.e. Savonius Wind turbine and Darrieus wind turbine. The Darrieus rotor comes in various subforms, including helix-shaped, disc-like, and the H-rotor with straight blades. These turbines typically have three slim rotor blades driven by lift forces, allowing them to achieve high speeds. Various simple designs may exist for vertical wind turbines, as detailed below. In pra.
