

Why not install solar power generation

Overview

While it is technically possible to install solar panels yourself, it is generally not recommended. Solar panel installation requires specialized knowledge and skills, and mistakes can be dangerous or costly. It's best to hire a qualified professional for installation. Solar panels are not worth it for everyone, including those who don't spend a lot on electricity, don't have the space for them, or plan to sell their home. One of the most significant barriers to entry for many homeowners is the high upfront cost of purchasing and installing solar panels. Panel Costs: Solar panel prices vary depending on quality. Solar panels, which are sometimes referred to as photovoltaic (PV) panels, are panels that consist of solar cells that are used to collect and convert sunlight into electricity for power generation.

Why not install solar power generation
