

# Wind power generation crashed

## Overview

---

Vineyard Wind, the nation's first large-scale offshore wind farm, was shut down by the federal government on Tuesday after a turbine blade failure sent thousands of pieces of debris into the ocean and onto the beaches along Nantucket's south shore. A wind turbine in Wisconsin collapsed, leaving a crater and debris strewn across a field. The blades and top portion of the wind turbine collapsed in Dodge County, near the town of Herman in southern Wisconsin. The GE turbine, which is part of the Butler Ridge wind farm, stands about 400 feet above. Nantucket Current has confirmed this photo of the broken turbine approximately 15 miles off the southwest coast of the island. Officials say it was a clear, windless day. 25,968 people played the daily Crossword recently.
