

Yantang Wind Farm Power Generation

Overview

Construction was completed in late October 2020. It comprises 51 turbines with hub heights of 105 metres (344 ft) to maximise performance in the site's specific wind conditions. The turbines are Vestas V150 variants with a 4.2 MW capacity, resulting in a total generation capacity of 214.2 MW. Yandin Wind Farm is one of Western Australia's largest [a][3][4] wind power stations, located in Dandaragan, Western Australia. Yandin Wind Farm is a 214.2 MW onshore wind power project. The 214 megawatt wind farm becomes the State's largest wind farm and is a very important addition to the State's electricity generation fleet. At full power, RATCH Australia Corporation acknowledges the Traditional Custodians of this country and pay our respect to Elders past, present and emerging. Yandin Wind Farm in Dandaragan, Western Australia is a sustainable energy source, managed by Alinta Energy, with 214 MW capacity, and 51 wind turbines.

Minister opens WA's largest wind

farm

At full power, the Yandin Wind Farm generates enough renewable energy to supply the equivalent of about 200,000 Western Australian homes. The US\$400 million Yandin Wind Farm ...

Product Model
 HJ-ESS-215A(100KW/215KWh)
 HJ-ESS-115A(50KW 115KWh)

Dimensions
 1600*1280*2200mm
 1600*1200*2000mm

Rated Battery Capacity
 215KWH/115KWH

Battery Cooling Method
 Air Cooled/Liquid Cooled

Yandin Wind Farm: Five years on and going strong

Located in the wheatbelt town of Dandaragan, 175 kilometres north of Perth, Yandin Wind Farm is a RATCH Australia Corporation and Alinta Energy investment, managed by Alinta Energy. Now five

Yandin Wind Farm

Yandin Wind Farm in Dangaragan, Western Australia is a sustainable energy source, managed by Alinta Energy, with 214 MW capacity, and 51 wind turbines.

Yandin Wind Farm Explained

What is Yandin Wind Farm? Yandin Wind Farm is one of Western Australia's largest wind power stations, located in Dandaragan, Western Australia.
